RESCUE iD

BE READY WHEN IT MATTERS MOST.

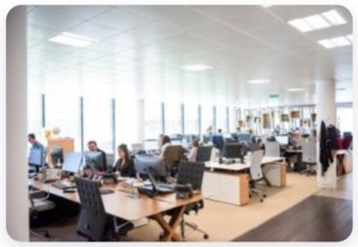
PROTECTING PEOPLE AND BRAND WITH RESCUE ID

RESCUE ID helps businesses take care of their people and respond instantly. Even at a distance.

PRIVACY & CONTROL

- The employee manages the information in a single account
- DNR, POA, key documents can be uploaded to be on scene
- No data selling
- Only emergency-relevant data is displayed
- Updates take effect immediately
- Auto-deletes from responder's device within 2 hours

PROTECTING EMPLOYEES



Benefits to the Employee

Instant access for responders.
One scan of the QR code shows the information they need: contacts, conditions, documents, and more.

Contacts notified immediately.
Designated contacts get a text alert the moment the QR code is scanned, so they pick up when a responder calls.

Benefits to the Business

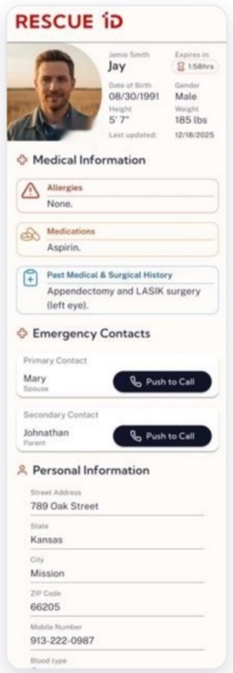
Improves liability and risk profile.
Real-time text alerts so response can be faster.

ID is small and durable.
Easily stored in key locations (i.e. wallet, ID badge, hard hat) to be quickly shared with responders.

Every scan is logged.
Have a record of who scanned, where, and when for reports.

SAMPLE ALERT AND RESPONDER VIEW

One scan gives the responder the profile, and alerts the manager.



> *I just looked at one of the training profiles and I said out loud, "this is SO COOL!" I wish every single person we have contact had one of these and maybe someday it will be the norm… I can already think of a handful of people who I know would find this so helpful…*
